

Beyond the Eyes: Understanding the Vision-Dementia Intersect

WEBINAR PRESENTATION · **MARCH 25, 2026 at 12:30-1:30 p.m. ET**

This session examines the critical, evidence-based link between vision loss and accelerated cognitive decline. Professionals will leave equipped with actionable strategies for early detection and intervention, and a framework for integrating eye health into broader brain health and aging practices.

Here's what you can expect to learn:

The correlation between vision loss and accelerated cognitive decline

Physiological and psychological ways poor vision impacts the brain

Vision-related symptoms that can be early indicators of Alzheimer's and related dementias

Key preventative and therapeutic strategies to mitigate the risk of vision-related cognitive decline

FEATURING

Donna Barrett, MSW, LSW

Program Manager, Senior Services · Summit County Public Health

Nicole Becher, MAEd
