

# When Dementia Doesn't Travel Alone: The Impact of Comorbidities in Dementia Care

WEBINAR PRESENTATION · **June 24, 2026 at 12:30–1:30 p.m. ET**

In this presentation, we'll explore the four most common comorbidities seen in individuals living with dementia and the potential impact on quality of life, health outcomes, and caregiver burden. Strategies and resources to improve management of comorbidities in dementia care, while decreasing caregiver burden will be discussed.

## Here's what you can expect to learn:

Approximately 70% of individuals living with dementia experience one or more comorbid/coexisting conditions.

Examine the four most common comorbidities seen in individuals living with dementia.

Discuss the impact of comorbidities on individuals living with dementia; healthcare costs and caregiver burden.

Identify strategies and resources to improve management of comorbidities in dementia care while decreasing caregiver burden.
